

Ian Hank

SOFTWARE DEVELOPER

✉ ihank86@yahoo.com

📍 Lancaster, Pennsylvania

☎ 7178089779

Objective

Actively seeking new opportunities to further my knowledge on software development and full-stack design. Able to problem solve and critically think through software design problems. Passionate, hard working, and able to adapt to learn any new languages and skills.

Skills

Object Oriented Programming

Skilled in Java, C#, Python, and the concepts of object oriented programming.

Web Development

Experience in designing and hosting fully-responsive websites using HTML, CSS, and JavaScript.

Database and API Design

Refactoring Java Terminal Code into a RESTful API using Spring Boot, Maven, and MongoDB

Analytics and Problem-Solving

Able to break down and solve software/design problems fast and efficiently. Competent in organizational and social skills that will aid in any work environment.

Education

West Virginia University

2017 — Present

BS Management Information Sciences / Minor Computer Science

Related Courses: Data Structures, Object Oriented Design Principles, Business Application Programming, Database Management Systems, Advanced Information Technology

Experience

Freelance Web Design

April 2016 — Present

- Meet with the client and discuss ideas for the design of the website while simultaneously providing insight and suggestions to better the final product
- Design the fully-responsive site from scratch to respond and scale properly on all modern browsers, phones, and devices
- Provide options for hosting the site based on the expected volume and the budget of the client
