

IAN HANK

FULL-STACK SOFTWARE ENGINEER | CLOUD & PLATFORM ENGINEERING

Great Falls, MT | (717) 808-9779 | ihank86@yahoo.com

linkedin.com/in/ian-hank | ian-hank.github.io | github.com/ian-hank

PROFESSIONAL SUMMARY

Full-stack software engineer with experience building .NET services, modern web and mobile applications, and secure cloud platforms. Combines C# and F# backend development with TypeScript, React, and React Native, plus hands-on AWS architecture, Kubernetes, infrastructure as code, and automated delivery.

TECHNICAL SKILLS

Languages C#, F#, C++, C, TypeScript, JavaScript, SQL, Python

Full Stack .NET, ASP.NET Core, Entity Framework Core, Dapper, REST APIs, React, React Native, Next.js

Cloud / DevOps AWS, EKS, Kubernetes, Docker, AWS CDK, Kustomize, Argo CD, GitLab CI/CD, Ansible, GitOps, IaC

Data / Quality SQL Server, PostgreSQL, SQLite, xUnit, Playwright, Git, Linux

PROFESSIONAL EXPERIENCE

Software Engineer (.NET)

Feb 2024 - Present

JMA Resources | Mechanicsburg, PA

- Led the migration from manual deployment handoffs to an immutable, containerized AWS platform on EKS, using AWS CDK, Kustomize, Argo CD, GitLab CI/CD, and Ansible.
- Automated infrastructure provisioning, AWS Managed Microsoft AD integration, and STIG hardening while implementing quality gates, container builds, and deployments across Windows and Linux runners.
- Reengineered data and server-log replication routines, reducing memory consumption by approximately 80x and improving remote SQL execution in intermittent-connectivity environments.
- Built a remote installer and patching system for application and database upgrades, reducing onsite maintenance requirements and accelerating field updates.

Junior Software Engineer

Jan 2023 - Feb 2024

JMA Resources | Mechanicsburg, PA

- Developed and maintained a cross-platform mobile application with an F# / Giraffe backend and React Native frontend for iOS and Android.
- Designed backend API endpoints and service layers using a data-first architecture, and integrated Stripe for secure purchases and subscription billing.
- Managed GCP and AWS hosting, CI/CD workflows, and Apple App Store releases, including provisioning, code signing, and production updates.

Systems Administrator

Jul 2022 - Jan 2023

JMA Resources | Mechanicsburg, PA

- Implemented security controls aligned with CMMC 2.0 and NIST SP 800-171, supporting certification readiness in a GCC High Azure environment.
- Built endpoint and vulnerability response processes and standardized secure configurations with PowerShell and Intune.

SELECTED PROJECTS

Lindsay Immutable-first, statically typed language and compiler built in C++17 with recursive-descent parsing and x86-64 Linux code generation.

StandupScript Compiler-style DSL with a handwritten lexer, parser, AST, and semantic model for structured standup reports and Markdown output.

EDUCATION

West Virginia University

Bachelor of Science in Management Information Systems, 2022
